

Andrea Wolfgang Diano-Bavaro

andread-b@hotmail.com | [Portfolio Website](#) | GitHub | LinkedIn

Citizenship: Italian (EU) | Bilingual: English & Italian

EDUCATION

Bachelor of Science in Computer Science University of Western Ontario <i>London, CA</i>	2021 – 2024
Relevant Coursework: OOP, Data Structures, Java, C++, Computer Networks	
MSc Coursework (Study Abroad) Aarhus University <i>Aarhus, DK</i>	2023 – 2023
Master's Level Credits: Wearable Hardware and Design, Augmented Reality Project	
Ontario Secondary School Diploma St. Michael's College School <i>Toronto, CA</i>	2015 – 2019
Basilian Book Award (+90% Average)	

EXPERIENCE

citi Full Stack Developer Citi <i>Toronto, CA</i>	May 2023 – Present*
– Engineering Automation: Engineered a Python migration engine and a Go "Update Server," reducing manual developer effort by 85% and automating global infrastructure lifecycle updates. – Developer Tools & Reliability: Spearheaded a UI/UX overhaul of a proprietary VS Code Extension (TypeScript/Node.js) and built a Robot Framework validation layer for global service health monitoring. – Platform Engineering: Optimized CI/CD pipelines using Docker, Harness, and OpenShift while managing scalable Java (Spring Boot) microservices and GraphQL integrations.	
Junior Software Developer Western Algorithmic Trading Club <i>London, CA</i>	Sep. 2022 – June 2024
– Data Ingestion Pipeline: Architected a real-time sentiment analysis engine using Python and Selenium to automate the scraping of social media data, transforming text into actionable market signals.	
Software Developer / Data Analyst YDM Incorporated <i>Toronto, CA</i>	May 2022 – Aug. 2022
– Operational Optimization: Leveraged Python (pandas) and SQL to identify structural cost inefficiencies, informing strategic shifts that resulted in a 10% reduction in costs.	

PROJECTS

AI Interview Insights Pipeline <i>Python, Hume AI SDK, Zoom SDK, OpenAI, FPDF</i>
– Multi-Modal Pipeline: Built an automated system to capture Zoom recordings, performing facial sentiment analysis (Hume AI) and LLM-driven transcription to generate comprehensive PDF interview reports.
Wearable Haptic Massage Sleeve <i>Arduino, C++, Electrical Circuitry, Hardware Prototyping</i>
– Embedded Engineering: Designed and wired a custom electrical circuit for a self-massaging leg sleeve; programmed an Arduino chip to regulate haptic feedback patterns and motor pressure intervals.
Night Finder (iOS) <i>Swift, Supabase, PostgreSQL, Windsurf AI</i>
– Algorithmic Matching Engine: Deployed a Toronto-focused discovery app with a custom matching engine and a real-time Supabase backend, using Windsurf for agentic refactoring and rapid prototyping.
OpenAPI Migration Automation Tool <i>Python, Regex, Java Spring Boot</i>
– Enterprise Automation: Engineered a Python-based engine to migrate 20+ microservices from Swagger 2 to OpenAPI 3.0, reducing manual migration effort at Citi by 85%.

TECHNICAL SKILLS

Programming: Go, Java, TypeScript, Node.js, Python, Swift, SQL, C++, Arduino/C, Bash
AI & Frameworks: Hume AI, OpenAI API, Spring Boot, Robot Framework, React, SwiftUI, Angular, Flask, Pandas
Tools & Cloud: Supabase, AWS, Docker, Harness, OpenShift, GraphQL, Windsurf AI, Circuit Design, Git
Languages: English (Native/Fluent), Italian (Native/Fluent)

*Internship converted to full-time.
